**EXPERIENCE YOU CAN TRUST**

**TOSHIBA**

General & 2D/Stress Test Echo Ultrasound  
 Capable of performing abdominal organs, eg. liver, gallbladder, spleen, pancreas, kidneys and bladder, Pelvic organs, eg. prostate, uterus and ovaries, Superficial organs, eg. breast, thyroid, muscles, joints (shoulders, ankles). Capable of 4D ultrasound to monitor the development of the embryo or fetus during pregnancy. Excellent for cardiac and vascular studies.

**McKESSON**

McKesson's state of the art Horizon Medical Imaging PACS solution is perfect for all clinical needs by enhancing productivity and reducing costs. It provides instant, secure, online access anywhere to current and prior images and reports.

**TOSHIBA**

**64 SLICE CT SCAN** - The advanced CT equipment installed at our facilities is capable of producing high-resolution 3D scans within very short scanning time.

With advancement in technology, the data can be reconstructed in various planes to produce 3D images with surface rendering, virtual colonoscopy, angiography, cardiac coronary vessels and calcium bone densitometry.

**TOSHIBA**

**X-Ray (Digital)** - The digital x-ray provides high resolution images and incorporates 5 tiered telescoping column overhead horizontal and transverse tracks for flexible positioning and for added productivity Integrated generator control.

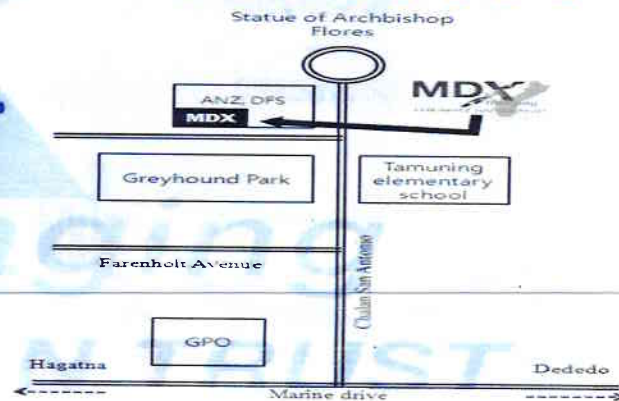

MDX Imaging Center provides a comprehensive range of diagnostic radiology services using brand new, state-of-the-art PACS, CT Scan, Ultrasound and Digital X-ray machines.

The MDX team is comprised of professionally trained and experienced radiologists and healthcare professionals to bring a radiological experience you can trust.

## X-Ray

T-RAD Plus Digital Radiography

**\*First in Guam\***

- Digital radiographs

## Ultrasound

High Resolution Toshiba Xario XG

- General Abdomen Ultrasound
- Small Parts
  - o Breast, Thyroid, Scrotal, MSK
- Vascular Ultrasound
  - o Carotid, Arterial, Venous
- OB/ Gyne Ultrasound
- 4D OB Ultrasound
- Echocardiography
  - o Adult & Pediatric Echo

## Computed Tomography (CT)

Toshiba Aquilion 64-slice Multi Detector CT

**\*First in Guam\***

- Whole Body
  - o Head/Neck
  - o Chest
  - o Abdomen
  - o Pelvis
- CT Angiography
  - o Brain
  - o Chest
  - o Abdomen
  - o Extremities
- CT Aortography
- CT Perfusion Imaging: Brain
- CT Coronary Angiography (CTCA)
- CT Bone Densitometry
- CT Colonography (CTC)

## MRI

- For now, referred patients will be done in GMH with the results read by MDX Radiologists

## Interventional Radiology (IR)

- All Ultrasound and CT Guided procedures (e.g. Biopsies, Thoracentesis, Paracentesis)
