### **NetCare Launches *NewSolutions* Self-Funded Plan**

**Hagatna, (GU) – March 21, 2012** - NetCare Life & Health Insurance Company announced today that it will launch a new program aimed at offering employers a self-funded plan called **NewSolutions**. With an increasing number of employers looking for alternatives to healthcare reform and a better way to manage and control their health care costs, NetCare offers an alternative financial arrangement for group benefit plans available for medium to large size employer groups.

NewSolutions puts the employer and employee in charge by self-funding their health care plan. Self-Funding allows more flexibility in the design of an employee health plan design. Under NewSolutions, an employer would contract with NetCare to process claims and enrollment, handle customer service and administer all benefit plans.

NetCare as a Third Party Administrator delivers responsive support and brings all the necessary components together in a single solution plan by offering the following features:

- Custom Plan Designs with flexible benefit choices
- Pre-negotiated, deep discount on provider reimbursements
- Comprehensive provider network on-island and off-island
- Comprehensive plan administration, including detailed reporting capabilities
- Dedicated Account Management Team
- Flexibility to adjust benefits to address utilization trends
- Stop loss or reinsurance coverage solutions
- Value Added Services including wellness programs, medical and disease management programs

Contact NetCare's Marketing Department at 472-3610 for further information and details.
