

# Healthy Steps to Wellness

Vol. 3 No. 4 April 2017

## **April is Autism Awareness**

#### What is Autism?

Autism, or autism spectrum disorder,

refers to a range of conditions characterized by challenges with social skills, repetitive behaviors, speech and nonverbal communication, as well as by unique strengths and differences.

Autism's most-obvious signs tend to appear between 2 and 3 years

of age. In some cases, it can be diagnosed as early as 18 months. Some developmental delays associated with autism can be identified and addressed even earlier.

### A Common Myth of People with Autism

### Myth

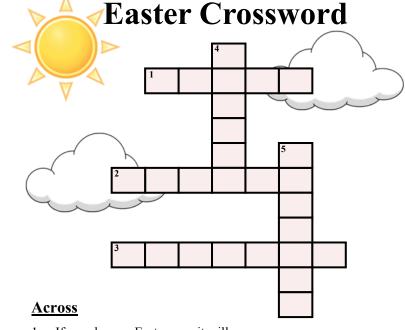

People with autism are intellectually

disabled.

#### Truth

Many people with autism have normal to high IQs and some may excel at math, music or another pursuit.

# **Distracted Driving Awareness**

The National Safety Council observes

April as Distracted Driving Awareness
Month.

Technology allows us to make phone calls, dictate texts or

emails and update social media while driving – all actions that are proven to increase crash risk. Just one second of your attention is all takes to change a life forever.

As a general rule, if you cannot devote your full attention to driving because of some other activity, it's a distraction.

Take care of it before or

after your trip, not while behind the wheel.

- 76% of Americans think the ears of a chocolate bunny should be the first to be eaten
- Egg dyes were once made out of natural items such as onion peels, tree bark, flower petals, and juices.

# How Can I Protect My Children from the Sun?

We all know the happiness and fun that Easter Egg Hunts bring to children. But one thing that many people forget is how damaging the sun's ultraviolet (UV) rays can be to our skin. Just a few serious sunburns can increase your child's risk of skin cancer later in life.

# Here a few things you can try when outdoors.

Seek shade, UV rays are strongest and most harmful during midday, so it's best to plan indoor activities then. Get a hat, hats that shade the face, scalp, ears, and neck are easy to use and give great protection.

made from tightly woven fabric offer the best protection

Wear sunglasses, they protect your child's eyes from UV rays, which can lead to cataracts later in life. Look for sunglasses that wrap around and block as close to 100% of both UVA and UVB rays as possible.

Apply sunscreen, use sunscreen with at least SPF 15 and UVA and UVB protection every time your child goes outside. For the best protection, apply sunscreen generously 30 minutes before going outdoors.

# Illnesses Caused by Heat

#### **Heat Stroke**

Heat stroke occurs when the body is unable to regulate its temperature.

#### **Heat Exhaustion**

Heat exhaustion is a milder form of heat-related illness that can develop after several days

of exposure to high temperatures and inadequate or unbalanced replacement of fluids.

#### **Heat Cramps**

Heat cramps usually affect people who sweat a lot during strenuous activity.

### **Heat Rash**

Heat rash is a skin irritation caused by excessive sweating during hot, humid weather. It can occur at any age but is most common in young children.

#### Sunburn

Sunburn is the term for red, sometimes swollen and painful skin.
